W. Ploss, D. Freude, H. Pfeifer, and H. Schmiedel, Leipzig: A Statistical Model for the Influence of Thermal Motion on N.M.R. Spectra in Solids. With 2 Figures 1

R. B. Winkler, J. Wilhelm, and R. Winkler, Greifswald: The Influence of Admixtures of Molecular Gases on the Efficiency of Radiation Production by Ar—Hg Mixture Plasmas used in Fluorescent Lamps. With 13 Figures 10

E. Siefart, Frankfurt/Main: Lifetimes of Excited Alkalilike Atoms Colliding by Van der Waals Forces with Inert Gas Atoms in the Groundstate. With 1 Figure 23

G. Röpke, Rostock: The Influence of Bound States on the Electrical Conductivity of a Partially Ionized Plasma (Born Approximation). With 1 Figure 35

M. Frenzel, W. Kallies, and K. Lewin, Berlin: Damping of Quark-Hadron Form Factors and Diffraction Scattering. With 3 Figures 43

W. Krech, Jena: Synchronization Phenomena in Arrays of Two Josephson Junctions. With 2 Figures 50

E. Kreisel, Potsdam-Babelsberg: On the Coupling of the Gravitational Field in the Quantum Field Theory 63

M. Schlanges and D. Kremp, Rostock: The Equation of State for the Hydrogen Plasma on Account of Atom-Atom Interaction. With 4 Figures 69

Index for the Volume 38 461

Delivered in April 1982

Number 2

B. Biedermann and H.-W. Wassmuth, Marburg/Lahn: Desorption- and Reactionkinetics of the Alkaline Earth Elements Calcium and Strontium with Chlorine on a Tungsten Surface — Part I: Chemical Equilibrium of the Surface Reaction $M + Cl \rightleftharpoons MCl$ in the Steady State (M = Ca, Sr). With 9 Figures 81

B. Biedermann and H.-W. Wassmuth, Marburg/Lahn: Desorption- and Reactionkinetics of the Alkaline Earth Elements Calcium and Strontium with Chlorine on a Tungsten Surface — Part II: Kinetics of the Elementary Steps of the Surface Reaction $M + Cl \rightleftharpoons MCl$ (M = Ca, Sr). With 5 Figures 97

Th. M. El-Sherbini and S. H. Allam, Cairo (A. R. Egypt): Energy Levels of Doubly Excited States in Argon 107

E. Kreisel, Potsdam-Babelsberg: The Cosmology of the Unitary Field Theory with Gravoelectric Induction 112

W. Krech, Jena: Synchronization Effects in a Linear Array of N Josephson Junctions. With 1 Figure 117

H. Günther, Potsdam-Babelsberg: Non-Linear Kinematics of Line-Structures 128

C.-V. Meister and G. Röpke, Rostock: Electrical Conductivity of Non-ideal Plasmas and the Ion Distribution Function. With 6 Figures 133

H. Dorn, H.-J. Otto, and E. Wieczorek, Berlin and Zeuthen: On the Summation of Non-leading Logarithms in QCD 149

Delivered in May 1982

W. Frank, P. Jaracz, K.-H. Kaun, J. Rüdiger, and Z. Stachura, Dubna (USSR): Impact Parameter Dependence of K-Shell Vacancy Production in Collisions of 1 MeV/a.m.u. Cu Ions. With 4 Figures 161

K. Germey, F.-J. Schütte, R. Tiebel, and K. Worlitzer, Potsdam: Quantum Statistics of Multimode Optical Bistability with Trilinear Interaction. With 3 Figures 170

Th. Klupsch, Jena: On Direct and Pair Correlation Functions of the Crystalline State and the Crystal-Liquid Phase Boundary 179

Th. Klupsch, Jena: Aspects of an Unitary Classical Molecular Theory of the Crystalline and the Fluid State at Thermal Equilibrium 186

H. Guratzsch, B. Kühn, and K. Hahn, Dresden and Tübingen (FRG): On the Present Status of the Problem of Charge Dependence and Charge Asymmetry of the Nucleon-Nucleon Force. With 3 Figures 195

U. Bleyer, Potsdam-Babelsberg: On Treder-Type Tetrad Theories of Gravitation. I. Equivalence Principle and Invariance Properties 203

U. Bleyer, Potsdam-Babelsberg: On Treder-Type Tetrad Theories of Gravitation. II. Treder's Tetrad Theories in Linear Approximation 209

R. Winkler, J. Wilhelm, S. I. Krasheninnikov, and V. V. Starykh, Greifswald and Moscow (USSR): Impact of the Vibrationally Excited States on the Macroscopic Behaviour of the Band-like Electron Beam Discharge Plasma in H/H_2-Mixture. Mit 14 Abbildungen 216

H.-E. Ponath and H.-G. Walther, Jena: A New Method of Determining the Autocorrelation Function of Polished Optical Surfaces. With 3 Figures 233

Delivered in June 1982

Number 4

R. Winkler, J. Wilhelm, and S. I. Krasheninnikov, Greifswald and Moscow (USSR): The Impact of Direct Ionization by Beam Electrons on the Electron Kinetics of the Beam Discharge Plasma in Molecular Hydrogen. With 8 Figures 241

W. Frank, P. Jaracz, K.-H. Kaun, J. Rüdiger, Z. Stachura, and A. Warczak, Dubna (USSR): K- and L-Vacancy Production in Asymmetric 1 MeV/N Collisions of Cu and Nb Projectiles with Au and Pb Targets. With 5 Figures 256

H.-J. Treder, Potsdam-Babelsberg: On the Principle of Equivalence in Wave-mechanics 265

V. Müller, Potsdam-Babelsberg: Gravitational Field Equations with Cross-terms and Static Equilibrium Configurations. With 2 Figures 271

K.-E. Sösse, W. Vogel, and D.-G. Welsch, Jena: A Simple Model for Describing Non-Markovian Vibrational Relaxation. With 2 Figures 281

R. Fischer, P.-V. Nickles, Tran Bá Chu, and L.-W. Wieczorek, Berlin: Optimum Conditions for Elliptical Focusing in Singly Resonant Optical Parametric Oscillators with Hemispherical Resonator. With 5 Figures 287

I. M. Ternov and W. A. Bordowitsyn, Moscow (USSR): The Spin Problem in Classical Electrodynamics 295

R. Göring and B. Schnabel, Jena: Influence of Magnetic Susceptibility on Position and Line-width of Proton Magnetic Resonance Lines in Powder Samples of Transition Metal Hydrides. With 6 Figures 301

Short Communication

H.-J. Treder, Potsdam-Babelsberg: On Experimental Tests of Mach's Principle 310

Delivered in September 1982
